

## Training & Certification

### **Guardicore Certified Segmentation Administrator (GCSA)**

Our five half-days program equips Guardicore Administrators with the expertise required to successfully use and operate the Akamai Segmentation (“Centra”) platform.

GCSA graduates will be confident in using the platform by themselves to implement and maintain the security needs of their organization.

The course covers Centra’s core features such as Visibility, Labeling, Microsegmentation, and Breach Detection; focusing on feature behavior and usage and guiding the students from the initial steps of configuration, all the way to the common day-to-day operations.

Throughout the course students are taught the necessary know-how required to implement a successful Micro-Segmentation project, including project planning, solution design, and policy implementation.

The course is designed for both entry-level and advanced users and is accompanied by an online, hands-on lab that is available for all attendees, for the duration of the course.

A certification exam is held at the end of the course.

### **Guardicore Certified Segmentation Engineer (GCSE)**

Our three half-days program equips the operational owners of the system with the skills and knowledge required to perform platform related administrative and maintenance tasks.

GCSE graduates will be able to manage the overall operational stability of the Akamai Segmentation (“Centra”) environment.

The course covers the following topics: Platform and Components Configuration, Integration with Third-party Tools, Platform Health Checking, Troubleshooting, and Common Maintenance Tasks.

The course is accompanied by an online, hands-on lab that is available for all students for the duration of the course.

A certification exam is held at the end of the course.

### **GCSE OnPrem**

Additional half-day session to equip operational owners of the Guardicore system with the skills and information required to perform platform related administrative and maintenance tasks.

GCSE On Premise students are trained to manage the Guardicore Centra Management Cluster.

The program covers the following topics: Management Cluster Architecture, Scaling, Disaster Recovery, Management Configuration and Control.

The program is accompanied by an online, hands-on lab that will be available for all students.

A certification exam is held at the end of the program.

This program is only available for graduates of the GCSE course.
