

# DEVOPS READINESS WITH AKAMAI PROFESSIONAL SERVICES

Partner with seasoned experts to get DevOps enabled faster

Akamai has an API for every initiative — anything you can do in Luna, you can do via the command line. You can manage, automate, and extend workflows with Akamai’s cloud delivery platform. Our Professional Services team can partner with you from the beginning of your Akamai for DevOps journey.

*“There is actually no limit to what we can automate as long as we have the drive and focus to get it done.”  
— Leading Akamai Commerce Customer*

Akamai has seasoned practitioners located around the globe with decades of industry experience. This partnership offers peace of mind and reliable expert guidance for proven DevOps adoption.

## Our Methodology

Our team strives to align at the start of your DevOps initiative. The goal is to co-create an Akamai DevOps roadmap that works for your business. The team will:

- **Assess:** Analyze where your business stands today
- **Plan:** Coordinate the best path forward, and get hands-on with {OPEN} and CLI
- **Validate:** Provide time-to-value and ROI, and reconfirm the impact to your business
- **Enable:** Supply expert recommendations and a prioritized roadmap
- **Operate:** Provide focus for DevOps teams and create long-term alignment

### Optimize Workflows For DevOps

Increase deployments and decrease load time

### Co-create an actionable plan

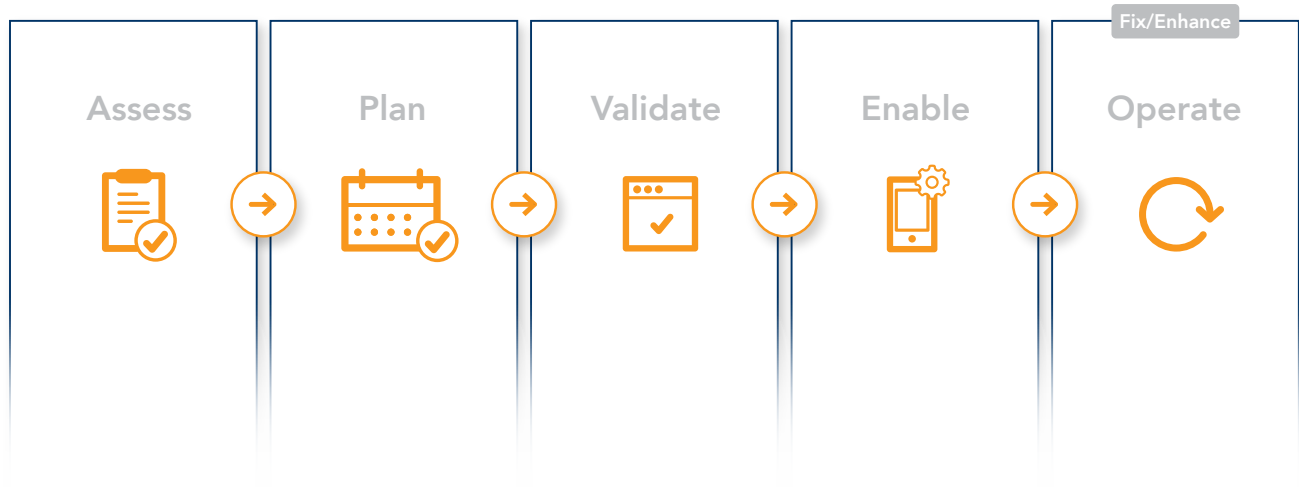

With a phased approach to pipeline integration

### Set your team up for success

With knowledge transfer and actionable plans tied to KPIs

## How It Works

## Our Skilled Practitioners

With decades of combined experience as technical experts in client-facing roles and a presence in the Americas, EMEA, and APJ, our team can get your DevOps initiatives roadmapped and in production, fast.

Want to know more about our team's experience?

- 100% cloud certified. Certifications include AWS, Google, and Microsoft Azure.
- Automates real-world production environments.
- Experience with Chef, Puppet, Salt, or Ansible in production environments.
- Strong scripting skills: PowerShell, Python, Bash, Ruby, Perl, etc.
- Knowledge of IP networking, VPNs, DNS, load balancing, and firewall.
- Experience with revision control source code repositories (Git, SVN, Mercurial, Perforce).
- Manages continuous integration servers like Jenkins, Bamboo, and TeamCity.
- Experience with automated testing tools (i.e., Selenium, JMeter).
- Understanding of Service-Oriented Architecture (SOA and REST).
