

## AKAMAI PRODUCT BRIEF

# Adaptive Media Delivery

High-quality and secure streaming media delivery on the globally distributed Akamai Connected Cloud

Global online audiences demand instant, uninterrupted access to video on any device, anywhere. With numerous options for video consumption at their disposal, these audiences have no qualms about turning to other providers to get the high-quality experience they demand. Meanwhile, the challenges of online content delivery are growing relentlessly, making it increasingly difficult to deliver consistent high-quality experiences to growing audience sizes amid frequent spikes in demand.

## Meeting Your Biggest Streaming Challenges

Working with a partner that can take concerns about reliability, scalability, and security out of the equation, especially when there are sudden spikes in global viewership, is a necessity. Any misstep can have a long-lasting effect on audience perceptions and brand reputation.

## Akamai Adaptive Media Delivery

Akamai Adaptive Media Delivery is optimized for adaptive bitrate (ABR) streaming to provide a consistent, high-quality viewing experience across the broad variety of network types — fixed or mobile — at varying connection speeds. Built on the Akamai Connected Cloud, Adaptive Media Delivery provides superior scalability, reliability, availability, and reach.

The solution securely delivers prepared, pre-segmented, HTTP-based live and on-demand streaming media, including support for the following video and music formats:

- HTTP live streaming (HLS)
- HTTP dynamic streaming (HDS)
- Microsoft smooth streaming (MSS)
- Dynamic adaptive streaming over HTTP (MPEG-DASH)
- Common media application format (CMAF)

## Related Products/Services

Akamai's complementary Media Services Live, NetStorage, or Cloud Wrapper can be combined with Adaptive Media Delivery for an efficient, high-quality streaming media solution. Adaptive Media Delivery can also be combined with Event Support or with Premium Service and Support 3.0 to help customers manage their live, linear, and on-demand video workflows without hassle.

## BENEFITS FOR YOUR BUSINESS

 **Maintain superior video quality and reliability**  
via Akamai's unique, globally distributed network architecture, which is backed by a 100% uptime SLA

 **Scale rapidly for large audiences — planned or unexpected — by leveraging the distributed network's ability to dynamically and intelligently distribute load**

 **Optimize online video playback quality and performance**  
through high-quality video streaming experiences that keep audiences engaged, extend viewing times, and support monetization

 **Reach audiences on any device**  
with support for a wide range of standard video streaming protocols

 **Get actionable insights**  
into streaming performance and quality of experience

 **Protect premium content**  
and secure revenue streams

## KEY PRODUCT DIFFERENTIATORS

 **Reliability, Capacity, and Scale**

 **Quality Through Technology, Innovation, and Experience**

 **Proximity — Closeness Counts**
